

Mechatronics in automotive industry

Conferences & Exhibition
June 24 & 25, 2009

Cité Internationale Universitaire
Paris, France

EMM 2009, the 7th European Mechatronics Meeting

Mechatronics in automotive industry : cars, trucks, construction equipments, agricultural machinery and railroad.

June 24 & 25, 2009

Cité Internationale Universitaire of Paris

For the past 6 years, European Mechatronics Meetings brings together the leading players from industry and research. This is the best way to exchange on new market needs and most relevant mechatronic technologies.

EMM 2009, 7th edition, will focus on mechatronics in and for automotive industry (Cars, Trucks, Construction Equipments, agricultural machinery and Railroad).

EMM 2009 is organised by [Thesame](#), the first European mechatronics network and [SIA, the French Automotive Engineers Society](#), in partnership with [Rhône-Alpes Automotive Cluster](#), [MOVEO](#) and [Arve-Industries](#) competitiveness clusters, [ARTEMA, the French mechatronic industry trade association](#).

- **EMM congress** will merge industry, SME's, research around actual trends in mechatronics, in market, in technology and in design methodology. [More information \(soon\)](#)
- **EMM Exhibition** : « The mechatronics show » At the same time, the exhibition space will allow visitors to carry out a real technological survey on the latest developments proposed regarding mechatronics products and services. [More information](#)
